Summary Statement:

The Frederick Arts Commission has been working on the Year 2009 Art Project.

Detail of Issue/Request:

This year's project consists of eight wind sculptures installed just south of 8th Street, between Colorado Boulevard and Main Street. This location has been reviewed by the Engineering and Public Works Department and final locates of utilities will be consider before installation of the sculptures. There will be eight different wind sculptures (a wind forest) installed; each being a

different height and width. The Frederick Arts Commission recommends the proposed grouping of the wind sculptures.

Cost of the project is estimated to be \$30,000, which includes the construction of the wind sculptures, installation and prep work. Final figures for the prep work is currently an estimate, once the utility locates is complete and defined a cost can be assessed. There was \$75,000 allocated in this year's budget, so the cost of the project is within the budget amount.

The Frederick Arts Commission is planning to have the project completed by Miners' Day.

Legal/Political Considerations:

Once the Board has approved the location and the type of sculptures, the Frederick Arts Commission can move forward with the project. A contract between the artist and the Town of Frederick will be drafted and details of the project will be addressed.

Alternatives/Options:

Suggest a different location
Suggest different types of wind sculptures

Financial Considerations:

Monies allocated in the Year 2009 Budget

Staff Recommendation:

Staff recommends approving the location and wind sculptures types.
